

## **MS-1 Update Features – v02.01.00 (A&B)**

### **Subsonic**

- Streaming to iOS, Android, and Windows 7 phone devices
- Streaming to web browsers
- Tag editing via Subsonic web interface
- Cover art selection via Subsonic web interface
- Podcast receiver - Subsonic can take an RSS feed and download podcasts - files go to "Podcasts" folder in the file system view
- Runs on port 4040 (<http://serverip:4040>)

### **Windows Network Share**

- Enabled Samba File Sharing for compatibility with Sonos & Squeezebox streaming devices

### **Web interface**

- Provides an interface to the MS-1 similar to the "Sources" tab on the iOS remote
- Play or queue files/folders
- Gives a better view of SHOUTcast station listings
- Volume control
- Playlist view for skipping around & clearing the playlist
- Runs on port 8080 (<http://serverip:8080>)

### **UPnP Sharing to other devices**

- Browse Library by Albums / Artists / Genres / Years

### **UPnP Media Rendering**

- Stream music to the MS-1.

### **Bug Fixes:**

- Supervision of media player - restarts within a minute if it crashes

### **Known Issues**

- Queuing doesn't work in IE on the web interface. It does work in Firefox, Safari, Opera, and Chrome.
