

The new v1.06 software for the Cinema 11a (25-3-2010) has revised the following:

- (1) The volume IC software has been redesigned for more effectiveness.
- (2) Added a "Maximum volume out" feature in the Advanced Settings menu.
This allows the user to set a maximum volume that the Cinema 11a will go to. The range is +15dB to -30dB and factory default is +15dB
- (3) Enabled the decoder of dts-HD HRA 96/24 3/2.1ch & dts-HD HRA 96/24 3/4.1ch
- (4) Overall system performance enhancement and minor bug fixes.
- (5) Test Tone level for AUTO SETUP can be adjusted by MASTER VOLUME.
- (6) Test Tone of SET BALANCE can be pre-adjusted by MASTER VOLUME.
